

Industry-Native ERP Software for

# Aluminium Alloy Extrusion Industry

Plan Better

Produce Smarter

Grow Stronger

A tailored ERP solution built around the processes, requirements, and operational needs of aluminium extrusion manufacturers.

## Product Overview

**Extrusion ERP** is a vertical enterprise software solution, **INDUSTRY-NATIVE ERP** exclusively as a **NICHE** product for the **ALUMINIUM EXTRUSION INDUSTRY**. It includes integrated modules for managing production, die management, inventory, sales, purchase, quality control, raw material management, human resources, and finance. The solution supports both on-premises and cloud-based deployments. **Extrusion ERP** helps extrusion manufacturers streamline operations, ensure compliance, optimize resource utilization, and enable data-driven decision-making across the shop floor and back office.

Seamlessly calculate pricing using predefined metal exchange prices (e.g., **NALCO**, **LME** etc.) and conversion rates. The system ensures precision, transparency, and consistency by automatically applying the correct price.

## Modules Covered in Extrusion ERP

Price Mgmt.**

**Store and Purchase**  
(Procurement)

**Tool Room/  
Die Shop**

**Foundry**

**Sales**

**PPC**  
(Production Planning  
& Control)

**Extrusion/  
Production**

**Quality  
Assurance**

**Value Added Services**  
(Anodizing,  
powder coating, etc.)

**Fabrication &  
Machining**

**Packing**

**Despatch &  
Billing**

**Plant  
Maintenance**

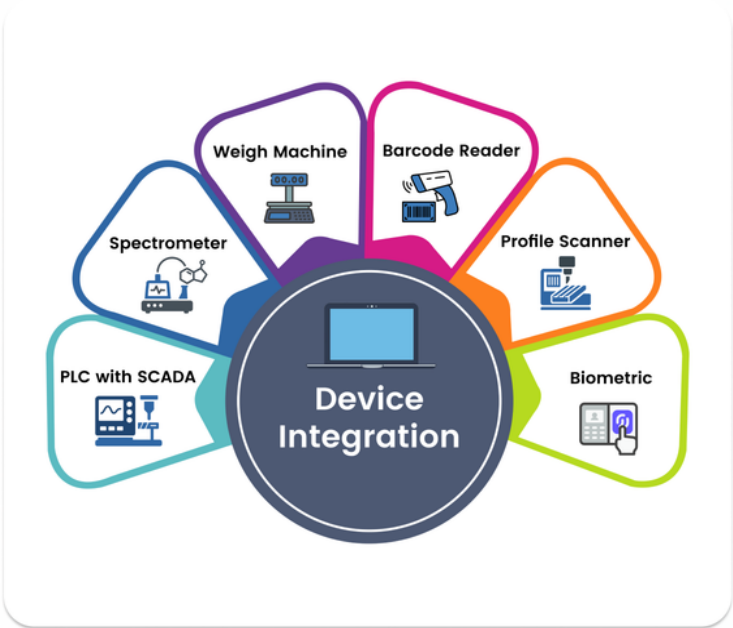

**HRMS**

**Integration**  
(AI, SCADA, IoT,  
API, etc.)

# Connected Shop-floor & Seamless Device Integration

## The Next Level of Intelligence for Your Aluminium Extrusion Business

The Future of XE – Extrusion ERP | AI-Powered Intelligence *Coming Soon...*

**DATA INTO INTELLIGENCE.**  
INTELLIGENCE INTO ACTION.
